TO INFO	Chief, KUCLUB		HEADQUARTERS FILE NO.	
FROM	Chief, <div></div>		DATE 10 July 1959	25X1
SUBJECT	Engineering/Operational Silver-Nylon Screening Cloth		RE: "43-3" — (CHECK "X" ONE)	
			MARKED FOR INDEXING	
			NO INDEXING REQUIRED	
ACTION REQUIRED			INDEXING CAN BE JUDGED BY QUALIFIED HQ. DESK ONLY	
REFERENCE(S)	<div></div> 59-665			25X1
<div></div> they have all read with interest the A&A report forwarded with the reference. The only additional information they furnished is quoted herewith:				
<p>"The nylon/silver cloth or mesh is normally sewn together. In most cases the nylon thread used in the machine will provide a good bond if the material is lapped and folded before sewing. A silver paint is used to bond the screening cloth or mesh to metalwork. This is very quick drying and has to be done in no more than 2 ft. lengths at a time. The paint, we believe, is made from flake silver and is bonded with a plastic using a tricoethelene type solvent. I hope the above is of some use to you."</p>
